

Assignment 02

Create a repository and initialize main branch.

Then create another branch (HTML) and make another directory for html.

Add all the html files under HTML repository.

After adding, stage it, commit it and checkout to main branch.

Take screenshot of the commit for html.

Request to merge from main branch using fetch command: (main)git fetch html

After merging, delete the html branch.

Repeat the same process for all other document like CSS, JS.

Attach the SS of commit below:

```
[shahid@Mds-MacBook-Air GitAssignment02 % git co -b "css"
Switched to a new branch 'css'
[shahid@Mds-MacBook-Air GitAssignment02 % mkdir css
[shahid@Mds-MacBook-Air GitAssignment02 % cd css
[shahid@Mds-MacBook-Air css % touch file01.css
[shahid@Mds-MacBook-Air css % touch file02.css
[shahid@Mds-MacBook-Air css % touch file03.css
